

**From the World Leader in
Electric Trailer Braking...**

Unleash the Power!

- **Digital LED displays voltage output and assists with leveling set-up**
- **Power wheel provides a numeric visual indication of gain settings**
- **Manual slide overrides the gain setting for full braking power**
- **Trailer brake lights illuminate when the manual slide is activated**
- **Short circuit protection prevents damage to controller and tow vehicle**
- **Industry leading seven-year limited warranty**

DEXTER AXLE

Predator DX2 Electric Brake Controller

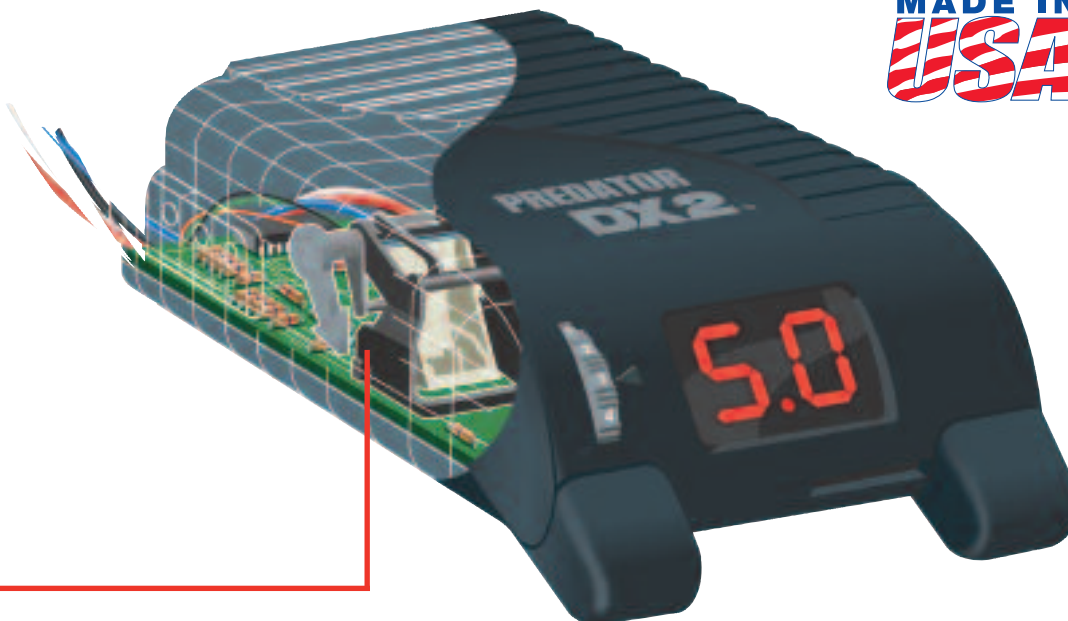

Standard Features

- 100% solid state design
- Standard 4-wire hook-up
- For all single and tandem axle trailers equipped with electric brakes and electric/hydraulic actuator

Inertia-Activated Braking System

- Solid state accelerometer reacts instantly to any change in tow vehicle deceleration and applies the trailer brakes at the same rate as the tow vehicle brakes

Advanced Features	Leading Competitor	Dexter Predator DX2
Digital LED that displays voltage output and assists with leveling set-up	NO	YES
Power window that provides a numeric visual indication of gain settings	NO	YES
Versatile mounting range of -35 to 90 degrees	NO	YES
Independent manual slide lever that overrides the gain setting for full braking power	NO	YES
Manual override that provides braking power at whichever setting is greater (gain or manual) instead of first dropping to zero output	NO	YES
Exceeds NHTSA regulations by illuminating the trailer's brake lights when the manual slide is used	NO	YES
Short circuit protection that prevents damage to the controller and tow vehicle	NO	YES
Seven year limited warranty	NO	YES
